- > battery 2.5 Ah/18 V or 5 Ah/18 V
- > battery life (normal operation) 1 - 2 hours
- > weight without battery 2.3 kg, with battery 2.7 kg
- > filling volume 1.2 litres
- > dimensions (no tube) 287 x 407 x 152 mm (HxWxD)
- > tube length (with nozzle) approx. 670 mm

In order to relieve the burden on municipal budgets and cover the costs of waste disposal, the disposal of small-scale waste is remunerated in accordance with the Single-Use Plastics Fund Act (SUP-Fund Act) by the German Environment Agency. In this way, public waste management organisations can achieve both ecological and economic benefits by having their cleaning services remunerated according to different categories:

- > road kilometres per year in km
- > paved and unpaved areas per year per 1,000 km²
- > volume of waste bins per year per 100 litres
- > gully bins per year per unit
- > total amount of waste per year per kg

The KIPPEX outdoor vacuum cleaner specifically collects recyclable waste without sand and stones. It eliminates the need for waste separation and simplifies the billing process.

Further information on the SUPFund can be found at www.einwegkunststofffonds.de/en

Public institutions can be reimbursed for the collection and disposal of cigarette butts with around

1,50 €
per inhabitant & year*
from the Single-Use Plastics Fund.
